

The migration has started.

Central banks, G7 authorities, and national cyber agencies moved quantum risk from conference talk into procurement language and platform defaults.

Organizations that wait for a headline will discover they are structurally late.

This Almanac is a decision-oriented guide for leaders who protect long-lived data.

- > The threat model that already justifies action
- > What breaks, what does not, what changes first
- > PKI, identity, and code-signing migration paths
- > Sector playbooks: finance, healthcare, government
- > 12-month action plan with board-ready language
- > Procurement workbooks and vendor scoring tools

"One of the most complex operational transitions I have encountered."

Lt. Gen. Mark E. Weatherington, USAF (Ret.)
Former Deputy Commander, Air Force Global Strike Command

THE QUANTUM ALMANAC

2026 - 2027

Signal over noise on quantum risk to data security

THE QUANTUM ALMANAC
ADER

2026-27

J NATHANIEL ADER

Foreword by Lt. Gen. Mark E. Weatherington, USAF (Ret.)

For boards, CISOs, architects, and investors
